

Mohamed Ashfaq

Software Engineer — Cybersecurity Enthusiast — Security Researcher

ash47306@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Chennai, India

SUMMARY

B.Tech Computer Science and Engineering student specializing in Cyber Security with hands-on experience in full-stack web and mobile development, application security, and secure REST APIs. Skilled in React, TypeScript, Python, Node.js, Flutter, SQL, and Supabase, with practical knowledge of JWT, RBAC, OWASP security practices, and Linux. RHCSA-certified with a strong interest in software development and cybersecurity.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, Dart, C++

Security: OWASP Top 10, REST API Security, JWT, RBAC, Burp Suite, Wireshark, Nmap, Metasploit

AI Tools: ChatGPT, Claude, Gemini, Perplexity

AI-Assisted Development: GitHub Copilot, Cursor, Claude Code, Antigravity

Frameworks & Tools: React, Flutter, Vite, Tailwind CSS, shadcn/ui, Node.js, Express.js, FastAPI, Capacitor

Systems & Tools: Linux (RHEL, Ubuntu), Git, GitHub, Docker

Databases: MySQL, PostgreSQL, Supabase

EXPERIENCE

Software Development Engineer Intern — [Verification](#)

Daasoft IT Solutions

Dec 2025 – Apr 2026

Pallavaram, India

- Developed 3+ web and mobile applications using Flutter, PHP, and MySQL, including responsive dashboards and backend API integrations.
- Secured 10+ REST API endpoints with JWT-based authentication and authorization controls, preventing unauthorized access to protected resources.
- Designed MySQL RBAC schemas for 4+ multi-tenant modules, enforcing role-based permissions and organizational data isolation.

Tech Stack: PHP, MySQL, Flutter, Dart, JavaScript, REST APIs, JWT, Linux, Git, Burp Suite

Software Development Engineer Intern — [Verification](#)

Cognivo-Future Technologies

Jun 2026 – Aug 2026

Chennai, India

- Developed full-stack features using React, TypeScript, Node.js, and Express.js across frontend interfaces, backend services, and REST APIs.
- Built Python and FastAPI services integrated with Supabase and PostgreSQL for data processing and application workflows.
- Implemented React Flow workflow interfaces, Razorpay payment integration, and authentication and authorization controls across application services.

Tech Stack: React, TypeScript, Node.js, Express.js, Python, FastAPI, Supabase, PostgreSQL, React Flow, Razorpay, Capacitor

PROJECTS

AwardX – Global Award Management Platform | [GitHub](#) | [Live Website](#)

Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Supabase, PostgreSQL, REST APIs

- Built a multi-tenant award management platform supporting program creation, award categories, public submissions, evaluation workflows, certification, analytics, and administrative operations.
- Developed a configurable form and workflow engine allowing administrators to define application fields, eligibility criteria, evaluation rounds, reviewer assignments, schedules, submission stages, and certificate workflows without code changes.
- Implemented end-to-end submission and evaluation workflows covering applicant registration, draft submissions, media uploads, reviewer scoring, round progression, and final award decisions.
- Secured organization-level data using RBAC and PostgreSQL Row Level Security (RLS), controlling access across users, programs, submissions, reviews, certificates, and administrative operations.

ACMH-IDS – UAV CAN Intrusion Detection System | [GitHub](#)

Tech Stack: Python, PyTorch, Scikit-learn, XGBoost, Optuna, Isolation Forest, Autoencoder, LSTM

- Developed a hybrid IDS combining Isolation Forest, Autoencoder, and LSTM with XGBoost stacking to detect DoS, Fuzzing, Replay, and Masquerade attacks in UAV CAN networks.
- Engineered temporal and payload features from time deltas, rolling statistics, payload change rates, transmission frequency, and CAN-ID patterns for anomaly detection.

- Optimized the pipeline with Optuna, achieving 93.02% balanced accuracy, 93.09% F1-score, 99.84% precision, and 0.938 ROC-AUC using time-series cross-validation.

Rental Utility POS and Inventory Engine | [GitHub](#) | [Live Website](#)

Tech Stack: React, TypeScript, Tailwind CSS, PHP, MySQL, REST APIs

- Built a rental management and POS system supporting customer management, vehicle/asset rentals, quotations, delivery challans, invoices, and payment tracking.
- Developed real-time inventory and rental tracking workflows to monitor asset availability, active rentals, returns, and transaction history.
- Created operational dashboards and reports for rental revenue, transport costs, outstanding payments, inventory status, and business performance.

EduTenant LMS – Multi-Tenant Learning Management System | [GitHub](#)

Tech Stack: Flutter, Dart, PHP, MySQL, REST APIs

- Built a multi-tenant LMS supporting student enrollment, attendance, course management, and academic performance tracking.
- Implemented role-based workflows and organization-level data isolation for administrators, instructors, and students.
- Developed REST APIs and MySQL data models for courses, attendance, grades, enrollments, and student progress.

EDUCATION

B.Tech in Computer Science and Engineering – Cyber Security	2023 – 2027
SRM Institute of Science and Technology, Kattankulathur, India 6th Semester CGPA: 7.33	
Higher Secondary (Class XII) – CBSE	2023
Vidhya Sagar Global School, India 75%	
Secondary School (Class X) – CBSE	2021
Vidhya Sagar Global School, India 84%	

CERTIFICATIONS

Red Hat Certified System Administrator (RHCSA)	2024
Red Hat – Credential verified via Red Hat Certification Central Verification Link	
C++ Systems Programming Essentials	2024
Scaler Academy Verification Link
